

Biochemistry Terms

- 1. acids
- 2. Activation energy
- 3. active site
- 4. adhesion
- 5. amino acid
- 6. amino group
- 7. Anabolism
- 8. atom
- 9. base
- 10. Biosynthetic pathway
- 11. Bon energy
- 12. buffer
- 13. capillary action
- 14. capping
- 15. carbohydrate
- 16. carboxyl group
- 17. carcinogen
- 18. Catabolism
- 19. Catalyst
- 20. cell cycle
- 21. cellulose
- 22. chemical reaction
- 23. cholesterol
- 24. chromatography
- 25. cohesion
- 26. compound
- 27. Condensation reaction
- 28. covalent bonds
- 29. Decomposition reaction
- 30. Dehydration synthesis
- 31. Denaturation
- 32. difference spectra
- 33. diploid cell
- 34. disaccharide
- 35. DNA
- 36. electron
- 37. element
- 38. energy
- 39. enzymes
- 40. Exchange reaction
- 41. fat
- 42. fatty acid
- 43. glucose
- 44. glycerol
- 45. hydrogen bonds
- 46. hydrogen ion
- 47. Hydrolysis
- 48. hydrophilic
- 49. hydrophobic
- 50. hydroxide ion
- 51. hydroxyl group
- 52. Inorganic Chemistry
- 53. Ion
- 54. ionic bonds
- 55. kinetics
- 56. lipids
- 57. Macromolecule
- 58. Metabolism
- 59. molecule
- 60. monosaccharide
- 61. Multistep reaction
- 62. neutron
- 63. nucleic acid
- 64. nucleotide
- 65. Organic chemistry
- 66. Organic compound
- 67. organic molecule
- 68. peptide bonds
- 69. pH scale
- 70. Phosphate group
- 71. phospholipids
- 72. Polymerization, illustration
- 73. polypeptide
- 74. polysaccharide
- 75. polyunsaturated fat
- 76. protein
- 77. proton
- 78. Reactant
- 79. Reaction rate
- 80. Reversible reaction
- 81. RNA
- 82. saturated fat
- 83. solution
- 84. Special conditions required for reaction
- 85. starch
- 86. substrate
- 87. surface tension
- 88. Synthesis (biosynthetic) reaction
- 89. Transformation
- 90. Translation

Biochemistry Terms

- 91. triglyceride
- 92. unsaturated fat
- 93. UV irradiation
- 94. Virus
- 95. Vitamin
- 96. Watson-Crick base pairs
- 97. wax
- 98. Z form
- 99. Zygote
- 100. Zymogen
